

# #SAFECONFERENCE

**Dear Conference Participants,**  
for your protection, we have implemented safety procedures during conferences and congresses organized by Via Medica.

We take the temperature of each participant arriving at the conference.

Prior to arrival, each participant must make a mandatory declaration, fill in a questionnaire, and accept the conference rules and regulations.

Each participant receives personal protective equipment — mask, hand sanitizer.

All conference participants are required to cover their mouths and nose, and to keep a safe distance of 1m from other participants, consistent with the latest administrative recommendations.

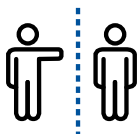

The chair arrangement in the lecture hall is in accordance with the latest administrative recommendations.

As an organizer of events for the medical community, we ensure GIS recommendations are observed.

During the event we disinfect doorknobs and chair rails in lecture halls and we air the rooms.

The number of participants is limited in line with epidemiological restrictions.
